4" Dryer Vent

4" Dryer Vent

Here at siding mounts

All of us at Siding Mounts understand the importance of your home. We are homeowners too, and we settle for only the highest quality and best-looking products we can find. Cladding is all too often either ugly or does not function as it is intended to, which will cause many problems down the road.

We design our products with functionality, aesthetics, and cost in mind. Nobody should have to break the bank to do some simple maintenance on their homes! With the 4" Dryer Vent, we designed it with everything you want in mind: simplicity, functionality, good looks, and easy application. Look no further than the 4" Dryer vent!

Product description

- Non-obtrusive vent door, beveled edges for wind deflection
- No cross louvers to obstruct the flow of exhaust
- Easy access to remove lint build-up

The 4" Dryer Vent is a non-obtrusive vent door designed to funnel the steam from your dryer and be released to the outdoors. It is available in two colours choices, one dark and one light, to accommodate any colour your home may be painted.

We designed this vent to include beveled edges, which means when the wind picks up, you will not be hearing clanking and banging coming from outside, because the aerodynamics of this product repel the wind. We also designed the 4" Dryer Vent without cross louvers because doing so can sometimes obstruct the flow of exhaust. This way, when the steam is being released, it pushes the lightweight door open, allowing for the easy flow of steam from your dryer to the outdoors.

We also designed the 4" Dryer Vent to include easy access in order to remove lint buildup. With this sleek design we have thought everything out, allowing you to optimize your ventilation experience while making sure the cladding is subtle, geometrically aesthetic, and a beautiful addition to any home.

Details

The 4" Dryer Vent comes in two colour choices: black or white. You also have the choice of getting a four pack, which comes with 4 vents complete with four 4" pipes. This sleek and functional design is a great
