

Connector

Connector

Here at siding mounts

Over here at Siding Mounts we know what quality means to a home. When we design our products, we design them with you, the homeowner, in mind. We know the cladding on a home is a defining feature of aesthetics. They need to look amazing and do their job properly, which is protecting your home against the elements. Many homeowners have discovered too late that mold or insects can be disastrous to the structural integrity of your home. Our guarantee at Siding Mounts is our products are made from high-quality materials and will always perform their intended function. But not only that! They will also look remarkably good and stylish for all your neighbours to see.

Product description

The connector is a product we designed to connect two lengths of vinyl handrail covers. It is nothing fancy and it does the job right. If you are looking for proper protection for your handrail than look no further. We know living in Canada means we are exposed to all sorts of elements as the seasons change and we want your home to be safe from whatever nature throws your way. With the Connector, this piece protects your handrail from the space between the two adjoining pieces where it would otherwise be unprotected. When we design our products, we design them with functionality and aesthetics in mind. The connector not only looks amazing, but it also functions exactly as it should. Simple and sleek design makes for high functioning products. There is a reason we are trusted by homeowners and contractors across the nation, and that's because of our quality and design!

Details

This Connector comes in two sizes: 2" x 4" and 2" x 6". It can also be found in two colour choices: sandalwood or white. Depending on if you want a more earthy tone or a more modern tone, these two options will give you exactly what you are looking for. As homeowners ourselves we know how important it is to find the right products and have the right options available.
