

Light Mount

Light Mount

Here at siding mounts

All of us at Siding Mounts understand the importance of your home. We are homeowners too, and we settle for only the highest quality and best-looking products we can find. Cladding is all too often either ugly or does not function as it is intended to, which will cause myriad problems down the road. When we design our products, we keep the homeowner in mind. We want your home to be beautiful and safe from potential problems. You can rest assured there will be no structural problems with our high-quality siding mounts.

Product description

The Light Mount is one of our most popular products. It features our water diversion system technology. Using a rain gutter and surface tension, water is directed from the top of the accessory, down the sides, and out over the exterior membrane by means of a bottom drip channel. Properly installed, it eliminates or greatly reduces the penetration of water into the cavity between the exterior membrane and the weather barrier of the building. Accommodates cladding thickness depths of 5/8", 3/4", 1" & 1 1/4" (1.59-3.18cm). The optional rain screen spacers simplify installation! Taking only minutes to install, this labour and cost-saving spacer works with all Third Wave siding accessories and is suitable for use with 1/2" or 3/4" strapping.

Details

The Light Mount has the base dimensions of 5 1/2" x 6 1/2" and the overall dimensions of 7 1/2" x 8 1/2". It features a 4" opening for your electric mount and comes with the options of light mount only or complete with rain screen. We are trusted by homeowners and contractors across the nation and you can find out why by adding to cart and seeing how our high quality products accommodate your home. We are homeowners who love our homes and we want the same for you, too!
