

Round Gable Vent – 22”

Round Gable Vent – 22”

Here at siding mounts

The cladding on a home not only determines look and aesthetics, but functions as protection against the elements. Like so many homeowners have already discovered, mold can compromise the structural integrity of a building. We understand the problems that can arise from having cheap cladding on your home, so we made high-quality products that not only perform their intended function, but also look absolutely stunning on your home!

Product description

The Round Gable Vent – 22” is a decorative gable vent that comes in a beautiful white to add some neutral highlights to whatever colour your home is. It looks gorgeous when added to darker tones to create contrast as well as lighter homes to allow flow. All the round gable vents include a decorative drip channel that is ideal for rain screen applications. It functions to funnel the water out and over the exterior finish of the house which is already protected with a coat of paint to prevent moisture from penetrating the stucco or siding. We designed this gable to include weeping holes which act to prevent condensation or moisture from getting trapped inside. Trapped moisture creates ideal conditions for mold to form, which can be disastrous to your home. Speaking of disastrous, we designed this Round Gable Vent with a molded-in screen which prevents pesky insects from nesting. Insects notoriously damage the glue and create further issues you may not even notice until it is too late. With our molded-in screen, insects do not stand a chance! The large rear angle allows for easy washing, and peel-and-stick application. We design our

products to be functional, stylish, and made with the homeowner in mind. There is a reason contractors love our products!

Details

The Round Gable Vent – 22” comes in one colour: white. It has dimensions of 22 x 22 x 2 centimeters, but also comes in a 19” size if you are looking for something a little smaller for your home. It is a very lightweight product, weighing only 2.6 kilograms, but is designed and built with materials meant to withstand time and whatever elements nature throws your way.
